2027 Neuro-Endocrine Pituitary Conference

9th California Pituitary Conference

Brought to you by Pacific Neuroscience Institute

[Bit.ly/Pituitary2027](https://bit.ly/Pituitary2027)

🕒 **Saturday, January 30, 2027**

8:30 AM – 3:45 PM

📍 **Annenberg Community Beach House**

Santa Monica, California

Course Director

Noa Tal, MD

Featured Invited Speakers

Maria Fleseriu, MD

Laurence Katznelson, MD

Kevin C. J. Yuen, MD

Sandra Aleksic, MD

The all-day course geared towards physicians and healthcare professionals focuses on in-depth information, providing an extensive immersion in advanced topics led by highly experienced and recognized experts in their fields.

In collaboration with Pituitary Network Association

PacificNeuro.org/Pituitary2027

Audience

The course is designed for endocrinologists, neurosurgeons, primary care physicians, nurse practitioners and physician assistants, fellows, and residents. The program is intended for healthcare professionals seeking to enhance their knowledge of the diagnosis, treatment, and multidisciplinary management of pituitary diseases.

Course Description

This comprehensive educational program highlights a multidisciplinary approach to the diagnosis and management of pituitary disorders. Led by nationally recognized experts, the course provides practical updates on the evaluation and treatment of pituitary disease. Topics include neuropsychology, patient advocacy, hormonal excess and deficiencies, registry-based research, and other emerging areas in pituitary medicine. Through the integration of expertise from endocrinology, neurosurgery, neuroradiology, pathology, mental health, and related specialties, the curriculum emphasizes evidence-based, patient-centered care aimed at improving clinical decision-making and patient outcomes.

Course Emphasis

The curriculum focuses on evidence-based approaches to pituitary disease management, including hormone excess syndromes, hormonal deficiencies, pituitary imaging, surgical decision-making, postoperative care, and long-term follow-up. Participants will gain practical tools for multidisciplinary collaboration and learn strategies to optimize outcomes and quality of life for patients with pituitary disorders.
